Run Qi (Jack) Li

Toronto, Canada li.jack0707@gmail.com linkedin.com/in/jackli0707 github.com/jackli921

Summary

Backend-focused full-stack developer with 3+ years of experience building reliable, automated systems that save businesses time and money. Former translator, interpreter, and teacher in Japan; trilingual in English, Mandarin, and Japanese (JLPT N1). Seeking a team that values quality work and improves by learning from and teaching each other.

Skills

Working Knowledge: TypeScript, Node.js, Express, C#, SQL, Azure, JavaScript, React, Git
Exposed: .NET, PostgreSQL, Docker, GCP, MongoDB, GraphQL, Next.js

Experience

Junior Software Developer Sept. 2025 – Present
LawyerDoneDeal Corp. - Legal tech software used by thousands of Canadian law firms *Full-Time*

- Led **3** developers delivering full-stack trust accounting features (React, Node.js, MS-SQL) end to end, from requirements with notaries through testing to beta release with marketing
- Built a nightly job (TypeScript, Azure) that moves law firms' old files to cheaper storage, covering **10,000+** files across **12** firms and replacing hours of manual cleanup, with savings that grow as files pile up
- Fixed a tool broken for a year (Node.js, SQL Server) that collects lawyer listings from **5** provincial law societies, so users pick up-to-date lawyers for their deals instead of typing details by hand
- Cut the slowest build pipeline by **33%** (18 to 12 min), giving developers faster feedback on every change
- Mentored a new hire and turned recurring newcomer questions into a self-serve onboarding wiki (setup, how-tos, common errors, architecture), so new developers find answers without waiting on teammates

Software Developer Nov. 2023 – Aug. 2025
ITI Group Inc - Manufacturing Execution Software development for industrial clients *Full-Time*

- Developed and tested custom full-stack features (inspection banners, KPI dashboards, RFID badge scanner logins) using C#, .NET, MySQL, JavaScript for clients including Dupont and AstraZeneca
- Reduced production defect reporting time by **70%** through the development of a keypad interface, saving operators **20+ minutes** daily across four factory lines, improving site's operational efficiency
- Improved codebase maintainability via refactoring and additional unit tests; Increased test coverage by **2%**
- Led cross-team communication efforts between Canada and UK, clarifying technical requirements, and ensuring consistent alignment on project deliverables and timelines across different timezones

Software Developer June. 2023 – Nov. 2023
ToBeDetermined Inc - Automated web scrapers on Google Cloud *Freelance*

- Pay doubled from $20 to **$40 USD/hr** in under **1 month** for exceeding expectations
- Built **10+** scrapers collecting data from **1M+** web pages, cutting failure rate from **8%** to under **1%**

Education

University of Waterloo Sept. 2014 – May. 2018
Bachelor of Knowledge Integration, Minor in Applied Language Studies *Waterloo, CA*
